FREEZE DRIED FRUITS, BERRIES AND VEGETABLES

FREEZE DRY FACTORY AND SHOCK FREEZING PLANT

THE LARGEST IN THE CIS COUNTRIES

The plant ranks among the world's three largest producers of sublimated fruits and berries in terms of raw material loading. Blast chambers with the highest capacity in Central Asia - up to 8 tons/hour.

Freeze drying is one of the most advanced methods, no chemicals or preservatives. It is a great alternative to expensive seasonal fruits. Freeze dried fruits are profitable in confectionery and culinary industries. All moisture is extracted from berries and fruits by blast freezing and heating under deep vacuum. In this case, the weight of the product is reduced, the shelf life is increased, and the original appearance, taste and useful properties are preserved.

FRUTTA FREEZE DRY FACTORY IS ONE OF THE THREE LARGEST IN THE WORLD

TECHNOLOGY PARTNER:

The world market leader since 1996 in the highly efficient removal of moisture from food DEVEX, a member of the KAHL Group, has its own Innovation Center for the development of food freeze drying technology in Bremen, Germany. The technology supply map covers all continents in more than 20 countries.

Experience in CIS - the largest coffee freeze dry factory in St. Petersburg (Russia). The largest DEVEX customers for freeze dried fruits and berries: Chaucer Foods in Oregon (USA) 48 tons per cycle, Diana Foods (France) 60 tons per cycle, PARADISE FRUITS (Germany) 20 tons per cycle, Otto Suwelack (Germany) 36 tons per cycle.

FREEZE-DRIED BERRIES, FRUITS AND VEGETABLES
